

BidFast[®]

**FAST, ACCURATE
SALVAGE VALUATIONS**

BidFast® from Insurance Auto Auctions (IAA) is a simple, accurate salvage valuation solution that is ideal in situations of owner retention, partial-loss conversion, denied coverage and subrogation file closure. With this tool, vehicles undergo a comprehensive analysis to determine their value, and you can easily obtain a bid that includes a written, 60-day guarantee. Each bid is then fully documented and will support Department of Insurance requirements for determining salvage values.

Obtain Bids Effortlessly

You don't need any manuals or calculations. IAA will handle the valuation process and ensure the following:

Partial-Loss Conversions

When repair estimates come close to the vehicle's total loss threshold, we will provide a high, accurate bid so you can build goodwill with customers who don't want their vehicle repaired.

Denied Coverage

If you can't service a claim for any reason, refer the owner to BidFast for a fast, fair bid and build goodwill by providing your customer an alternate salvage disposition solution.

Subrogation File Closure

Subrogation files can warrant fast closure. An immediate bid from BidFast will provide undisputed salvage value for either party.

Owner-Retained Salvage

For a concrete bid for you or your insured, rely on BidFast. Towing, IAA storage and title document fees are included in the bid price.
