

IAA Inspection Services®

GET THE FULL PICTURE

IAA Total Loss Solutions® provides carriers with a comprehensive, seamless platform to process auto insurance claims efficiently, from the loss event to asset liquidation. It is built to:

- Compress timelines and reduce costs.
- Maximize workforce efficiency.
- Support policy holder retention.

As part of Total Loss Solutions, IAA Inspection Services® provides a technology-based process for remote vehicle inspection and appraisal services.

HOW IT WORKS

Enhanced Images - More than 30 high-definition images offer a crystal-clear look at your vehicle, and a multi-level QA process ensures they are of the highest quality every time. Ditch the guesswork and see the damage first hand without deploying assets to the field.

Condition Reporting - Our condition reporting provides pre-loss vehicle condition and option details and easy access to the information required to generate an accurate appraisal. To make things simple, we support all leading industry estimating platforms.

Appraisal - When it comes time for the appraisal, we give you options. IAA will work with your existing vendor or staff appraisers, or provide access to one of our strategic partners. Once the appraisal is complete, use IAA Market Value to establish the estimated salvage value for auction.
