

IAA Loss Advisor™

**GET STARTED WITH
PREDICTIVE ANALYTICS**

IAA Total Loss Solutions® – our latest technology innovation – provides carriers with a comprehensive suite of products and services to process auto insurance claims efficiently, from the loss event to asset liquidation. It was designed to:

- Compress timelines
- Maximize workforce efficiency
- Support policyholder retention

As part of Total Loss Solutions, IAA Loss Advisor™ gives call-center representatives the tools to more accurately determine if a damaged vehicle is a candidate for total loss. IAA Loss Advisor reduces operational costs and gets vehicles to the inspection phase more quickly. That means a smoother process from first notice of loss (FNOL) to settlement, and a better customer experience.

HOW IT WORKS

Early Assessment – Upon FNOL, claims specialists enter information about the vehicle’s damage based on the owner’s answers to a few short questions. A points system accounts for the reported damage, actual cash value (ACV) and salvage value, and quickly determines if the vehicle is repairable or should be considered a total loss.

Customizable to Your Needs – You’re in control. Fine-tune the point values for each question to align with your company’s total-loss standards.

Robust Reporting – In addition to a predictive total loss report, the system will provide visibility to early total loss (ETL) performance, including reporting volume by team or individual, total loss ratio by team or individual and detailed information about every loss evaluation.
